

ENGINEERING SERVICES

From a physical part to a more dependable manufacturing process.

Siemens NX postprocessors, manufacturing applications, automation, 3D scanning, CAD design and reverse engineering delivered with a practical production focus.

REAL COMPONENT SCAN - 3D MEASUREMENT DATA

AREAS OF COOPERATION

01

Siemens NX and postprocessors

NC output aligned with the machine, controller and programming standard used in the plant.

02

Applications and automation

Tools that reduce manual work and bring structure to production data and documentation.

03

Scan to CAD

3D scanning, CAD reconstruction and geometry prepared for analysis, modification or production.

DELIVERY APPROACH

PROBLEM

CONCEPT

TEST

IMPLEMENTATION

DESCRIBE A PROJECT

Let us discuss one concrete manufacturing task.

Send an example part, program or process. We will respond with focused questions and a practical next step.
